Things You Will Need

*One, 8-foot-long, 1-by-10-inch cedar or pine board (no treated or painted wood)
*1 1/4" wood screws
*Set of two 1 1/2" hinges
*Circular saw
*Measuring tape
*Framing square
*Cordless drill
*Spiral bit set
*Driving bit set
*3-inch hole saw bit
*Sandpaper
*Safety gear, eye protection, and gloves
*An adult, parent, or partner to help and for safety

Steps for the Box

Step 1: Measure and cut pieces according to the drawing

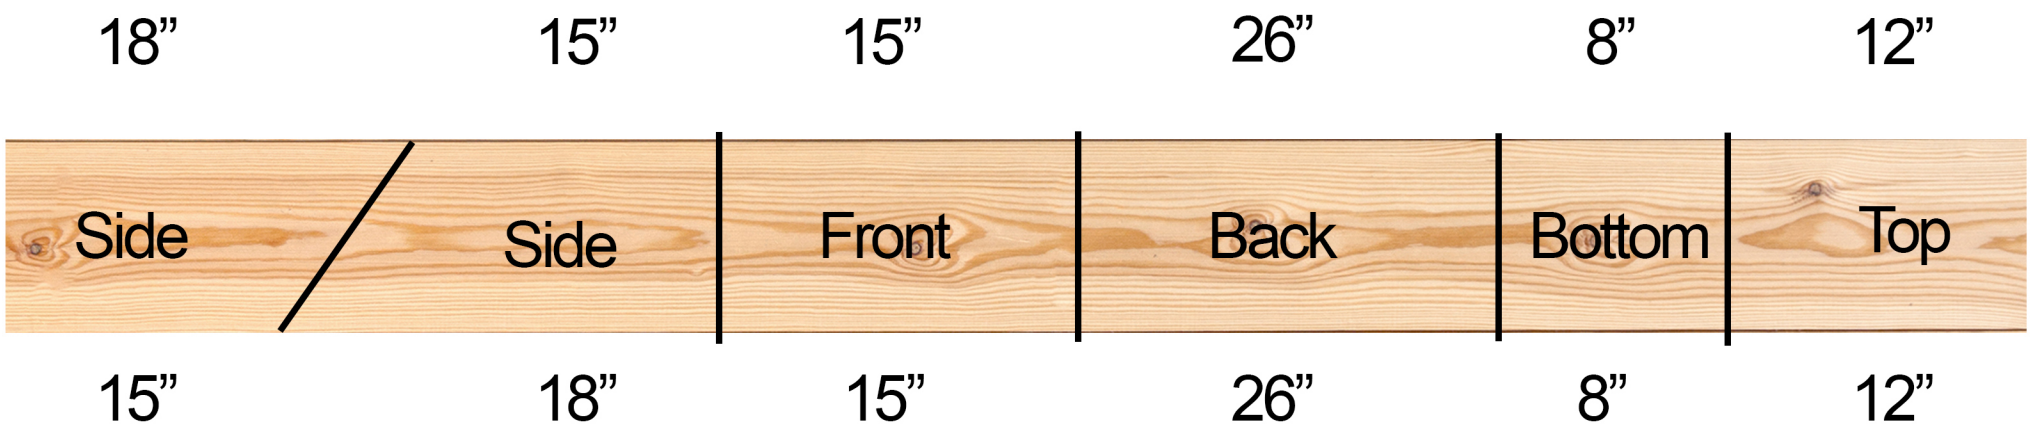
Step 2: Measure and drill a 3" entrance hole on the front piece 10" up from the base

Step 3: Assemble pieces (I assembled the sides first, then the bottom, & front)

Step 4: Attach the top with hinges

Step 5: Add dry leaf litter or wood shavings, drill drainage holes, & sand entrance hole

Step 6: Place in Tree (10 to 30 feet above ground is best facing east)

8-foot long, 1”x10”, cedar or pine, non-treated, non-painted cut with these measurements


not drawn to scale
